## The Mirage PivotPro Easy Release Handle

*An innovative design that allows for smooth and effortless opening of the screen door.*

- ✓ Simply twist the handle to release the magnetic closure, no buttons or latches.
- ✓ No tugging or pulling the screen to open.
- ✓ Can be opened with one hand; maintain control and smoothness of the screen.
- ✓ Ergonomically shaped for easy grasp.
- ✓ Fits all door applications.
- ✓ Simple installation with few mechanical parts.

Mirage Screen Systems Inc. introduces the PivotPro Easy Release (*patent pending*) handle which allows the retractable screen to be opened and closed effortlessly. The Mirage PivotPro operates with a simple twist of the handle, which allows the rare earth magnet to easily detach from the closure.

This innovation solves a fundamental challenge with retractable screens in that a magnet is the key to a strong screen closure and provides optimal application flexibility - but can also be a nuisance when trying to open the door. The PivotPro makes use of this tried and true product feature while also providing painless entry and exit of your home.
